# Corporate introduction

Shenzhen INVT Electric Co., Ltd. (INVT for short, stock code: 002334) was founded in 2002, focusing on the fields of industrial automation and energy power. It was listed on Shenzhen Stock Exchange (SZSE) and issued A shares in 2010. Adhering to the core values of "Achieve customers, performance orientation, open and win-win cooperation, struggle and innovation" and with the mission of making every effort to offer most valuable products and services to strengthen customer competitiveness, INVT provides differentiated and specialized industry solutions, customized technical services, global localization operations, and digital management models to global customers.

## Core competitiveness

**Company scale:** INVT has 4 large bases of production and research, 15 holding subsidiaries, and over 5000 employees.

**R&D capability:** INVT is a national key high-tech enterprise in China's Torch Program and a drafting unit for the national standard of low-voltage VFDs. It has established a strict quality management system and passed CNAS certification. The R&D testing laboratory has been awarded the Acceptance of Client Testing (ACT) accreditation by TUV-SUD in Germany, and the main products are CE-compliant. INVT has also been recognized as the National Enterprise Technology Center, and Guangdong Engineering Technology Research Center, and has undertaken a number of national, provincial and municipal science and technology projects. By the end of 2023, INVT has 1538 patents and 283 computer software copyrights.

**Marketing and service network:** INVT has set up dozens of branches and hundreds of joint warranty centers around the world, and has established strong cooperative relationships with many domestic and international channel partners. This comprehensive sales and service network enables INVT to respond quickly to global market demands and provide immediate technical support and quality after-sales service.

## Business segments

**Industrial automation:** Offering VFDs, servo systems, motors, controllers, human-machine interfaces, sensors, elevator drive systems, industrial internet, and other products and integrated solutions, which are widely used in compressors, cranes, solar pumps, printing and packaging machinery, 3C electronics, lithium-ion battery equipment, semiconductor equipment, offshore equipment, iron and steel, petroleum, chemical industry, and other fields.

**Network power:** Offering micro module data centers, power supply and distribution products, intelligent temperature control products, intelligent monitoring products, and integrated solutions, which are widely used in cloud data centers, finance, communication, medical, energy, and other fields.

**New energy vehicle:** Offering comprehensive products such as main motor controllers, auxiliary motor controllers, vehicle controllers, and onboard power supplies, covering the full range of solutions for commercial vehicles and passenger cars.

**PV energy storage:** Offering grid-tie inverters, energy storage inverters, off-grid inverters, monitoring accessories, which have been applied in many scenarios at home and abroad.

# Product introduction

The GD880 series High performance engineering drive is divided into two topological forms: single drive and multi drive, and is a transmission product positioned for high-end applications. The product is modular designed based on the DFX concept and adopts advanced control algorithms. It has excellent speed and torque control performance, high reliability, high power density, convenient installation, debugging, maintenance, and comprehensive protection.

- Excellent speed and torque control performance
- Modular design, as flexible as building blocks, making project integration simple and efficient
- Long-life component selection and fast fault recovery design to ensure efficient process control
- Ergonomic design to make installation and maintenance easier
- Enriched expansion capability to support various protection options

## Application fields

### Metallurgy

High speed bar and strip hot rolling equipment, wide and thick plate equipment, cold rolling host, pickling line, annealing line, galvanizing line, color coating line, non-ferrous metal manufacturing, rolling equipment, diaphragm pump.

### Building materials

Support for and technical renovation of large-scale equipment such as rotary kilns, ball mills, belt conveyors, and crushers.

### Petroleum

Heavy petroleum equipment such as fully electric drilling rigs, energy storage and repair rigs, electric drive transformation of large petroleum machinery equipment, oilfield water injection equipment, fracturing prys, and sand mixing prys.

### Marine

Shore based power supply, ship main side thrusters, anchor winches, shaft generators, DC networking system, and ship auxiliary equipment.

### Port hoisting

Quayside crane, tire crane, rail crane, ship unloader, gantry crane, belt conveyor, large shipbuilding gantry crane, large metallurgical casting crane.

### Testing

Battery simulator, engine testing platform, motor testing platform, and new energy vehicle testing system.

### Papermaking

Joint equipment for paper copying, including production lines such as pulp box, mesh section, pressing section, drying section, gluing, hard calendering, coating, super calendering machine, and rewinding machine.

### Others

Technical renovation and supporting application of equipment such as centrifuges, textile equipment, shield tunneling machines, grinders, and electric shovels.

# Technical data

	Item	Specifications
Basic rectifier	Input voltage	4: 380- 440VAC 3PH ±10%, -15%<1min 6: 520- 690VAC 3PH ±10%, -15%<1min
	Input frequency	47-63Hz
	Output voltage	Input voltage * 1.35
	Overload capacity	Light overload: 110% of ILD for 1 min every 5 min Heavy overload: 150% of IHD for 1 min every 5 min
	Work efficiency	≥98%
Regenerative rectifier	Power factor	≥0.95 (Basically at rated current)
	Input voltage	4: 380- 440VAC 3PH ±10%, -15%<1min 6: 520- 690VAC 3PH ±10%, -15%<1min
	Input frequency	47-63Hz
	Output voltage	Input voltage * 1.3 – Input voltage *1.4
	Overload capacity	Light overload: 110% of ILD for 1 min every 5 min Heavy overload: 150% of IHD for 1 min every 5 min
Active rectifier	Work efficiency	≥98%
	Power factor	≥0.95 (Basically at rated current)
	Input voltage	4: 380- 440VAC 3PH ±10%, -15%<1min 6: 520- 690VAC 3PH ±10%, -15%<1min
	Input frequency	47-63Hz
	Output voltage	4: 1.5 * Input voltage- 720V; 6: 1.5 * Input voltage- 1080V
Inverter	Overload capacity	Light overload: 110% of ILD for 1 min every 5 min Heavy overload: 150% of IHD for 1 min every 5 min
	Work efficiency	≥97%
	Power factor	≥0.99 (Basically at rated current)
	THD	THDI < 5% (at rated power) THDU<5% (Rsc>20)
	Input voltage	4: 510- 720VDC 6: 700- 1035VDC
Environment condition	Output frequency	0-400Hz
	Output voltage	0-0.7 * VDC
	Overload capacity	Light overload: 110% of ILD for 1 min every 5 min Heavy overload: 150% of IHD for 1 min every 5 min
	Work efficiency	≥98.5%
	Control method	V/F; SVC; FVC
Mechanical data	Motor type	Permanent magnetic synchronous motor; asynchronous motor; linear motor
	Starting torque	FVC: 0Hz/200%; SVC: 0.25Hz/150%
	Accuracy at stable speed	FVC: ±0.01%; SVC: ±0.1%
	Speed fluctuation	FVC: ± 0.02%; SVC: ± 0.3%
	Dynamic speed decrease	FVC: 0.3%*s- 0.5%*s, SVC: 0.1%*s- 0.3%*s (@100% torque step)
	Speed regulation ratio	V/F: 1:50; SVC 1:200; FVC: 1:1000
	Torque accuracy	FVC: ≤3%; SVC: ≤5%
	Torque response	FVC: <5ms; SVC: <10ms
	Working temperature	-10°C - +50°C; Derating is required when the ambient temperature exceeds 40°C
	Relative humidity	5%- 95%, no condensation
	Installation altitude	Below 1000m (Derating is required when the altitude exceeds 1000m Derate by 1% for every increase of 100m.)
	Anti-vibration performance	Compliant CLASS 3M4 in EN60721-3-3 100m/s 11ms
	IP rating	For the module: IP00      For the cabinet: IP20
	Safety performance	Compliant with EN 61800-5-1
	Cooling	Forced air cooling

# Product features

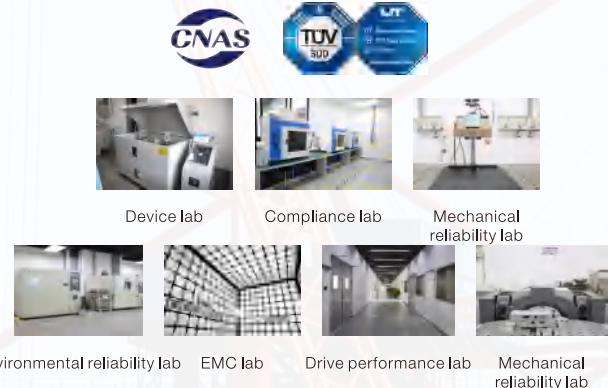

## Highly reliable

- Selection of long lifetime components to ensure quality from the source and stable running of equipment.

### Selection of long lifetime components

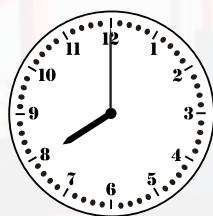

- A comprehensive testing and validation system ensures that products undergo multiple verifications and tests from design to factory, ensuring their reliability from the source.

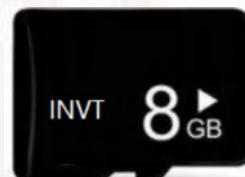

- Independent air duct and thickened imported conformal coating provide dual protection, meeting IEC60721-3 3C3 environmental requirements. The corrosion resistance in scenarios such as high humidity, high salt spray, and corrosive gases is significantly improved.

- Built in real-time clock function for more accurate fault information.

- Standard storage card for quick and convenient parameter backup.

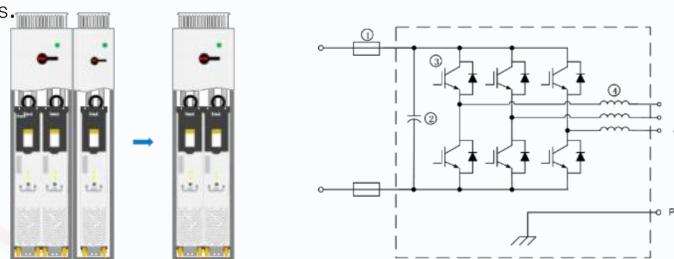

- Fault classification Users can define 10 faults, which can be grouped and handled by severity, including shielding a fault without processing, alarming but keeping running, decelerating to stop, and coasting to stop, so as to reduce unnecessary downtime and ensure continuous operation of equipment.

Fault severity 1	Shield the fault
Fault severity 2	Alarm but keep running
Fault severity 3	Decelerate to stop
Fault severity 4	Coast to stop

### ● Derating due to faults

Independent three-phase power unit design ensures the system can be derated to keep running in case of unit failure so as to minimize shutdown losses.

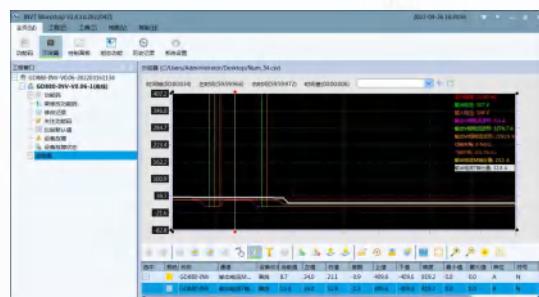

- The A8i unit adopts a quick plug connection and has built-in rollers at the bottom so that it can be directly pushed into the cabinet. The unit can be disassembled or assembled without removing the motor cable. The drawer design for fans facilitates easy maintenance and replacement.

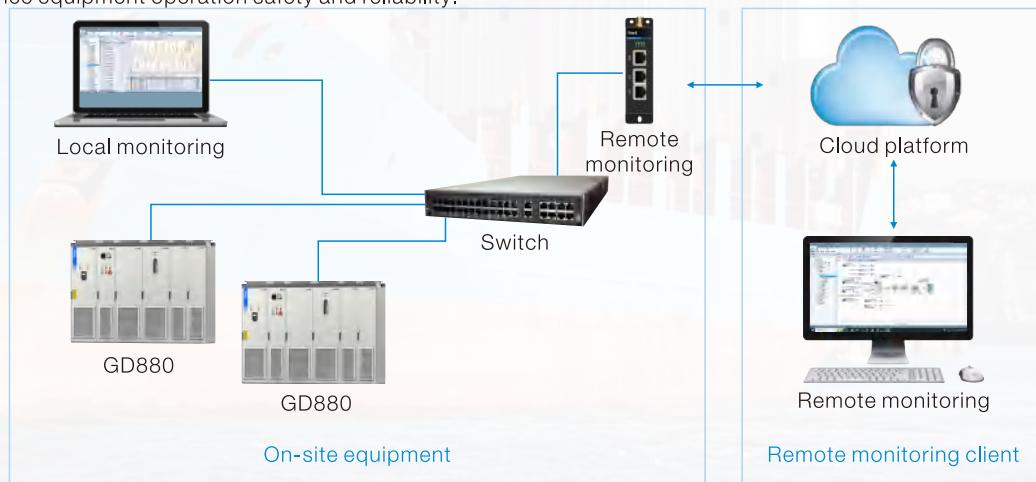

### ● Fault recorder

Saving data to 10 channels, saving 100 groups of fault waveform data cyclically through re-writing, and analyzing faults without the need of fault simulation.

### ● Remote O&M

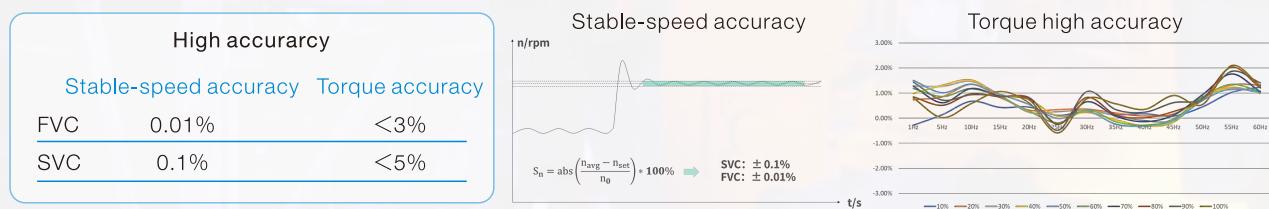

After being authorized, manufacturer technical experts can connect on-site equipment through the Internet of Things to help fault locating, observe equipment operation data, and optimize operation parameters, so as to improve production efficiency, and enhance equipment operation safety and reliability.

## Excellent performance

### ● High-speed and high-accuracy control

The multi-core architecture achieves high-speed and high-accuracy loop computing control, with good process consistency and improved product quality for customers.

### ● High dynamic response

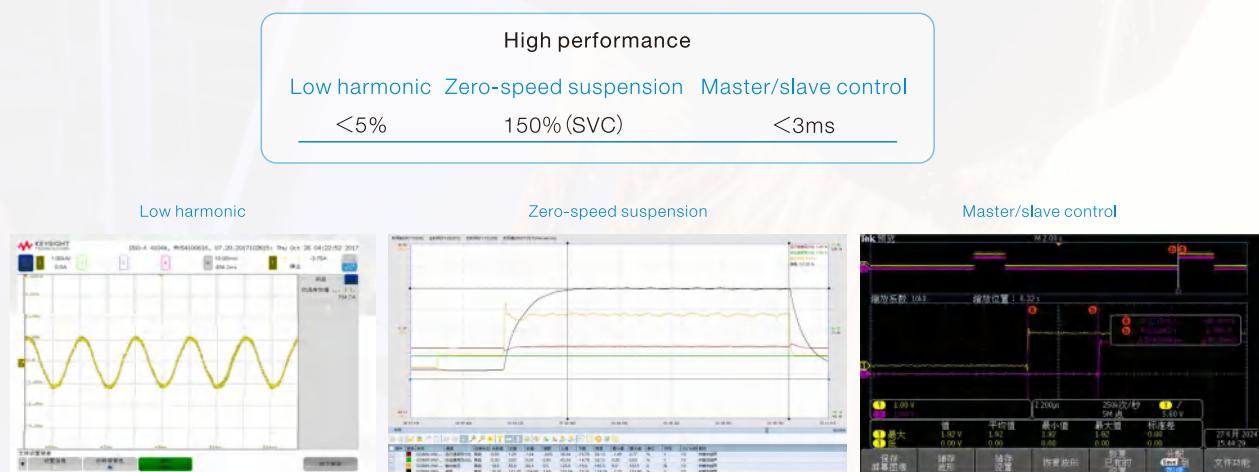

Real time load observation, achieving torque response of less than 5ms, with small speed drop area, fast speed recovery, and reducing pulling force.

### ● High performance

Four-quadrant product THDi < 5%, far below the limits specified by IEEE519 and G5/4, achieving the directly feedback of the power grid excellent low-frequency performance, making it easy to cope with lifting loads.

Master/slave control with millisecond-level response, achieving more balanced load distribution.

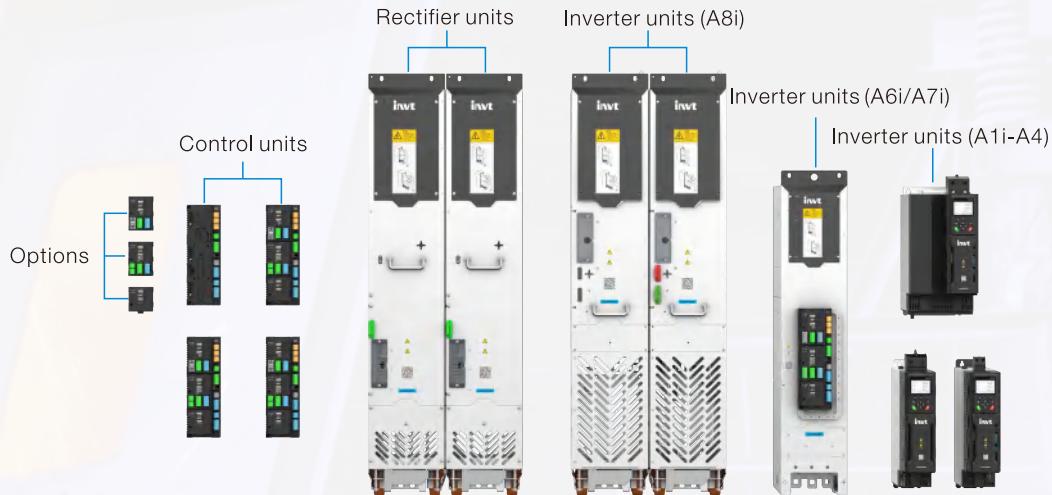

## Flexible and easy to use

### ● Modular design

Control component modularization, making scalability flexible.

Power unit modularization, facilitating integration.

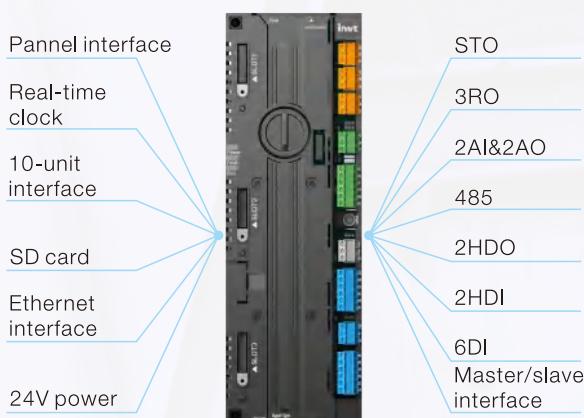

Modular front maintenance design for cabinets, achieving engineering need based combination to shorten delivery time and facilitate maintenance.

### ● Abundant options for expansion

Abundant system resources and I/O configuration, with user I/O functions differentiated by color to prevent accidental insertion and removal.

Control unit equipped with a standard 3-channel expansion interface, including encoder module, I/O, communication expansion functions, achieving interconnection and interoperability of industrial equipment.

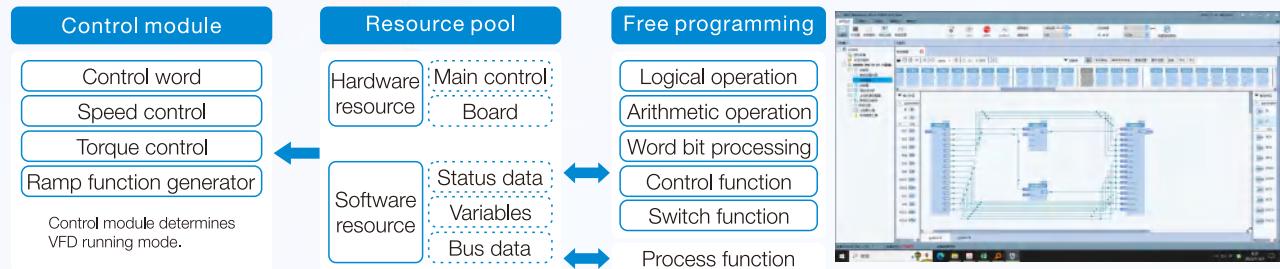

Options		
<ul style="list-style-type: none"> <li>· HTL encoder module</li> <li>· TTL encoder module</li> <li>· Resolver encoder module</li> </ul>	<ul style="list-style-type: none"> <li>· I/O module</li> </ul>	<ul style="list-style-type: none"> <li>· Profinet IO communication module</li> <li>· Profibus-DP communication module</li> <li>· CANopen communication module</li> <li>· Fiber-optic module</li> </ul>

### ● Free programming

By using open control units and expansion I/O resource status, operation status, control word, status word and other resource interfaces, free programming can achieve secondary development and seamless integration with third-party control substitution, significantly reducing transformation workload, and assisting upgrading.

Programming can be modular and configurable, reducing non-standard code development, ensuring firmware consistency, facilitating spare parts management, and reducing maintenance costs.

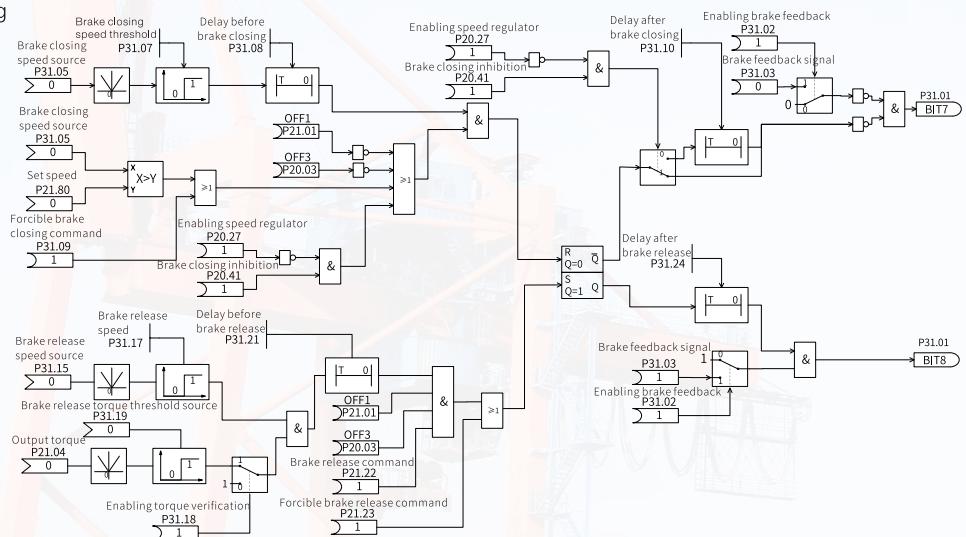

### ● Holding brake logic

Integrated with lifting holding brake control logic, effectively shortening the development cycle of automation systems.

#### ▲ Integrated with lifting holding brake control logic

- External/Local brake control for selection
- Brake feedback detection to ensure safety
- Torque memorizing and pre-torque to ensure smooth starting
- Zero servo ensuring safety without slipping

#### ▲ Anti-snag protection to handle emergency

### ● Easy to debug

LCD screen with intuitive display, without the need to consult the operation manual, saving debugging time.

Supporting parameter upload, storage, and download, saving engineering batch debugging time through parameter copying.

IP54 high protection design, supporting cabinet door external connection for easy integration.

Type-C firmware/word library upgrade for fast language adaptation.

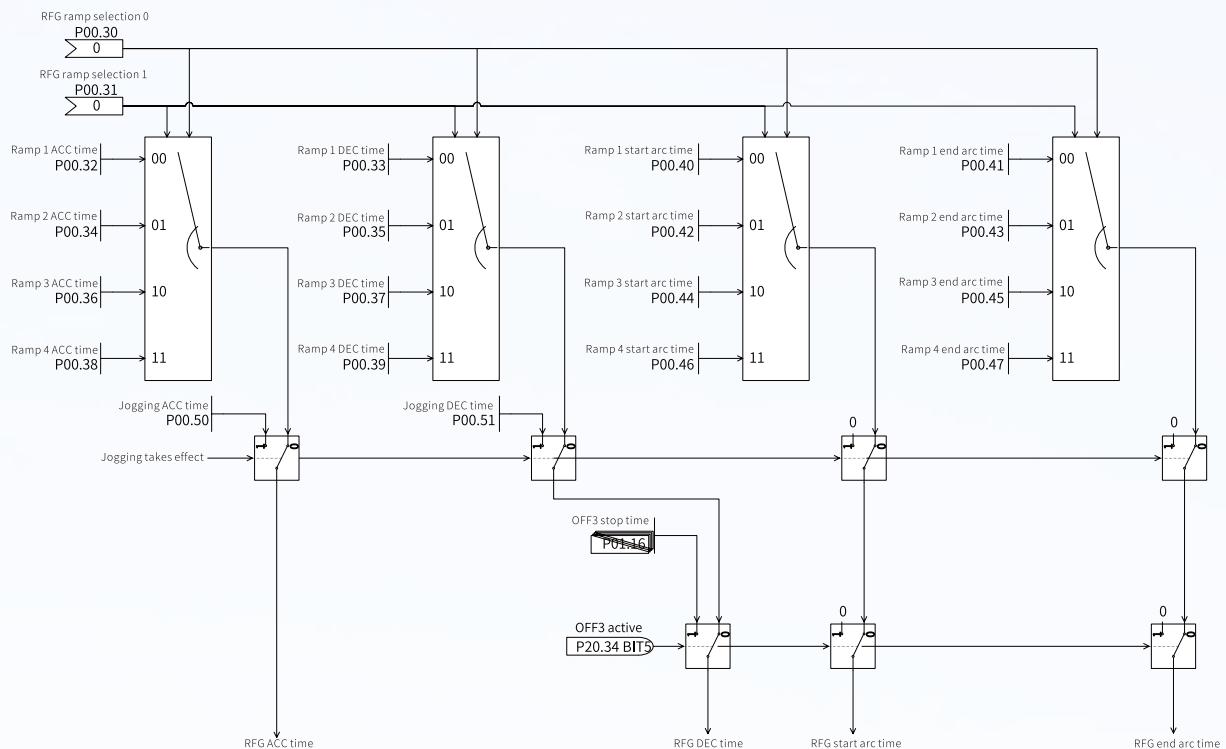

### ● Open function diagram

Function modularization and clear definition, convenient for engineers to learn and use at low cost.

Open data flow diagram and transparent control scheme.

Function diagrams integrated with data testing for easy problem locating.

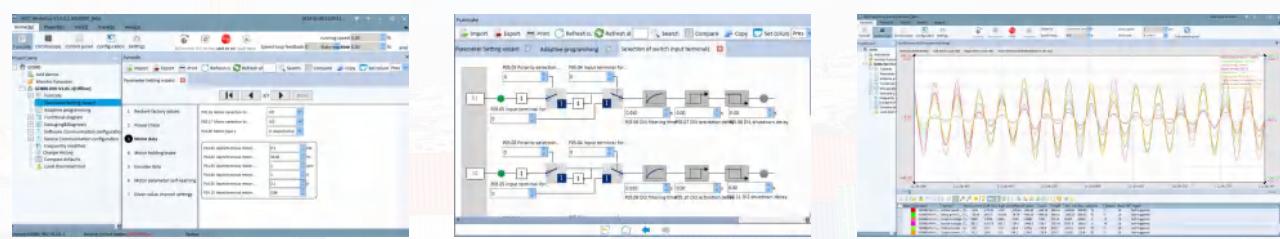

### ● Workshop host controller software

Standard Ethernet debugging interface to achieve local and remote debugging, monitoring, and maintenance of drive equipment . Professional debugging wizard to quickly complete drive configuration, improving debugging efficiency.

High speed online oscilloscope, supporting multi-device monitoring, with each device supporting the storage and playback of 10 channels of waveform data, and real-time display of status information, convenient for quick problem locating, greatly improving debugging efficiency.

Support for function parameter comparison, batch upload, download, printing, and file export.

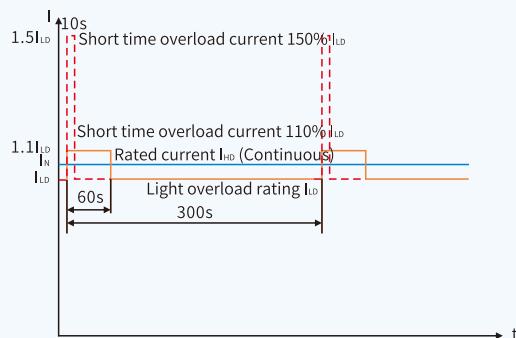

# Type designation

**GD880 - 51 - 0650 - 6 - LC - Z**

Description	Example
Abbreviation of product series	GD880: GD880 Series Engineer VFD
Product type	11: Variable-frequency drive unit 16: 2-quadrant variable-frequency drive cabinet 41: 3PH braking unit      46: 3PH braking cabinet 51: Inverter unit      56: Inverter cabinet 71: Basic rectifier unit      76: Basic rectifier cabinet 81: Regenerative rectifier unit 86: Regenerative rectifier cabinet 91: Active rectifier unit      96: Active rectifier cabinet 09: DC/DC Converter      09C: DCDC converter cabinet 26: Active-rectifier 4-quadrant variable-frequency drive cabinet 36: Regenerative rectifier 4-quadrant variable-frequency drive cabinet
Rated value	Rated current: 650A Rated power: 41/46
Voltage class	4: 380-440VAC 3PH ±10%, -15%<1min 6: 520-690VAC 3PH ±10%, -15%<1min
Product management No.	Default: Air cooling LC: Liquid-cooling N: A8n unit L2: A8L2 unit
Product management No.	Default: Unit supply Z: Component supply Z(12DF): 12-pulse rectifier Componentsupply

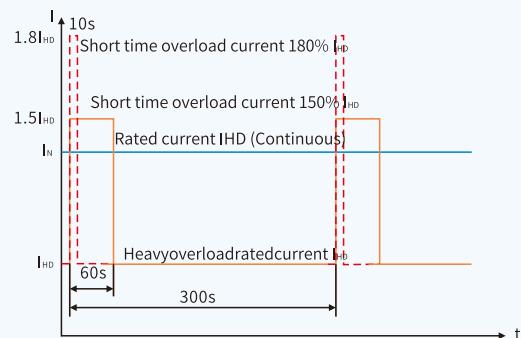

## Overload curve

Based on light overload continuous operating current  $I_{LD}$ , the power unit has overload capacity of 110% overload for 60 seconds every 5 minutes or 150% overload for 10 seconds every 5 minutes.

Light overload application

Based on heavy overload continuous operating current  $I_{HD}$ , the power unit has overload capacity of 150% overload for 60 seconds every 5 minutes or 180% overload for 10 seconds every 5 minutes.

Heavy overload application

Note: The 10s short-term overload current is related to the unit temperature, and different overload modes are different.

A8+L	1275	500	584	420
2*A8+L	1275	730	584	615

#### Note:

Nominal ratings:  $I_N$ , Rated current available continuously without overloadability at 40 °C.  $I_{\max}$ , Maximum output current. Available for 10 seconds at start, then as long as allowed by drive temperature.

Light overload use:  $I_{LD}$ , Continuous current allowing 110%  $I_{LD}$  for 1 minute every 5 minutes at 40 °C.

Heavy overload use:  $I_{HD}$ , Continuous current allowing 150%  $I_{HD}$  for 1 minute every 5 minutes at 40 °C.

\* The whole series should be used with AC detection modules, fiber-optic communication modules, etc. For a complete list, please refer to the Ordering information.

\* Rectifier units in A8 and above frames feature a fast connector design. The LCL model uses a filter unit, while products in other frames utilize LCL filter components.

\* Component supply (-Z) is recommended. For details, please refer to the Ordering information.

$U_N=690V$  (range 520 to 690V). The power ratings are valid at nominal voltage 690V (437 to 6070kW).

**Input: 510...720Vdc output: 0-0.7\*Vdc** The power ratings are valid at nominal voltage 400V (4 to 3000kW).

- \* The products in the A6i and A7i frames can be optionally configured with built-in precharge (except for GD880-51-0516-4).
- \* The products in the A8i frame use built-in output reactors, quick plug, backend cable exit.
- \* The products in the A8n frame use direct connection, frontend cable exit, without output reactors.
- \* The products in the A8L2 frame use built-in output reactors, frontend cable exit, and cable connection.
- \* Component supply (- Z) is recommended. For details, please refer to the Ordering information.

**Input: 700...1035Vdc output: 0-0.7\*Vdc** The power ratings are valid at nominal voltage 690V (55 to 6500kW).

#### Note:

The panel and control unit need to be purchased separately for the products in the GD880-11 Variable-frequency drive unit.

Nominal ratings:  $I_N$ , Rated current available continuously without overloadability at 40 °C.  $I_{max}$ , Maximum output current. Available for 10 seconds at start, then as long as allowed by drive temperature.

Light overload use:  $I_{LD}$ , Continuous current allowing 110%  $I_L$  for 1 minute every 5 minutes at 40 °C.

Heavy overload use:  $I_{HD}$ , Continuous current allowing 150%  $I_{LD}$  for 1 minute every 5 minutes at 40 °C.

\* The heat dissipation refers to the heat generated by the unit, excluding any heat produced by the reactor.

\* Rapid overload applications: Based on rapid overload continuous operating current  $I_{\text{st}}$ , the power unit has overload capacity of 200% overload for 10 seconds per minute.

\* Heavy overload applications: Based on heavy overload continuous operating current  $I_{\text{HD}}$ , the power unit has overload capacity of 150% overload for 60 seconds every 5 minutes.

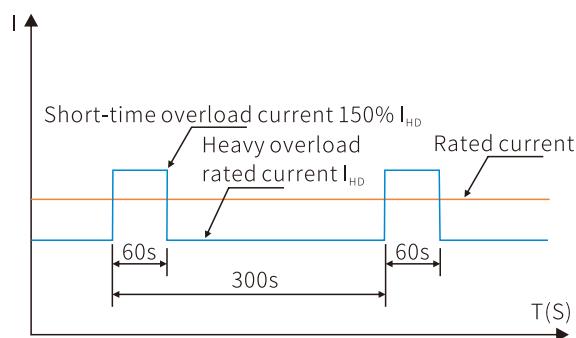

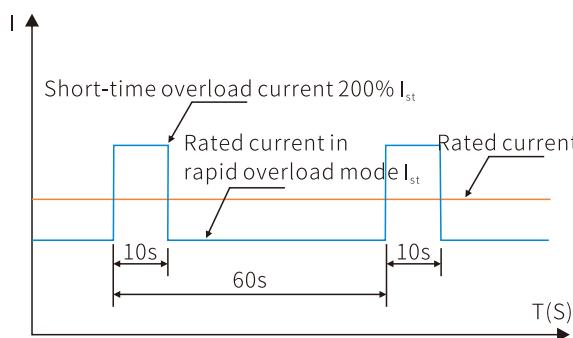

\* Component supply (-Z) is recommended. For details, please refer to the Ordering information.

## Rapid overload application

Based on rapid overload continuous operating current  $I_{\text{st}}$ , the power unit has overload capacity of 200% overload for 10 seconds per minute.

## Heavy overload applications

Heavy overload applications: Based on heavy overload continuous operating current  $I_{\text{HD}}$ , the power unit has overload capacity of 150% overload for 60 seconds every 5 minutes.

Heavy overload use:  $I_{HD}$ , Continuous current allowing 150%  $I_{HD}$  for 1 minute every 5 minutes at 40 °C.

# Control unit

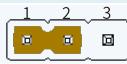

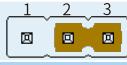

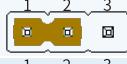

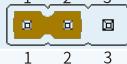

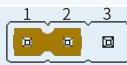

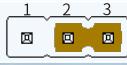

## GD880 - ICU - 11

Description	Example
Abbreviation of product series	GD880: GD880 series engineering VFD
Control unit type	ICU: Inverter control unit TCU: Basic rectifier control unit RCU: Regenerative rectifier control unit ACU: Active rectifier control unit DCU: DC/DC control unit BCU: 3PH braking control unit
Master-slave	1: Master/slave interface (Rectification without master-slave)  1: One power unit (rectifier /inverter units) 2: Two power units (regenerative /active rectifier units) 3: Three power units (basic rectifier units or inverter units) 4: Four power units (regenerative /active rectifier units) 6: Six power units (rectifier /inverter units) A: Ten power units (active rectifier /inverter units)
Unit connection	

# Control unit interface description

Terminal NO.	Terminal identification	Terminal Description	Cable specifications
<b>Input power supply</b>			
1	+24E	24Vdc±10%2A	Two-core twisted-pair cable is recommended Cross-sectional area: 0.5-2.5mm <sup>2</sup>
2	CM		
<b>Digital input</b>			
1	DI1		
2	DI2		
3	DI3		
4	DI4		
5	DI5		
6	DI6	1. Input impedance: 3.3kΩ 2. Voltage input range: 12-30V 3. Supports NPN and PNP bi-direction input, relay contact input 4. Max. input frequency: 1kHz	Single-core wire Cross-sectional area: 0.5- 2.5mm <sup>2</sup>

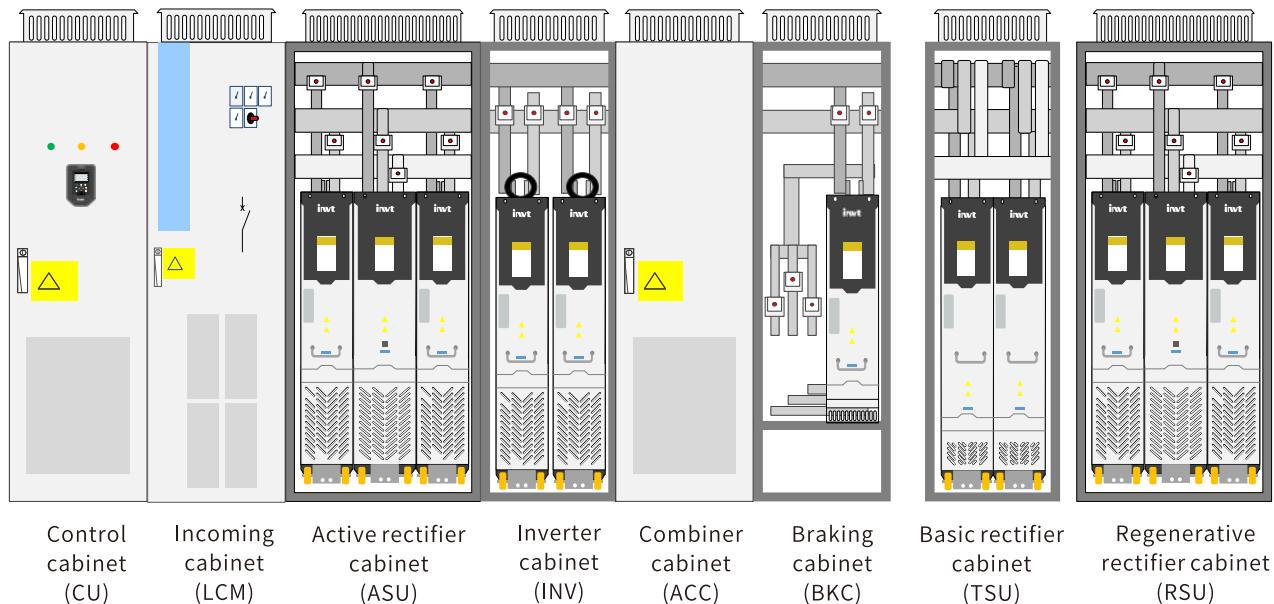

Terminal NO.	Terminal identification	Terminal Description	Cable specifications
<b>DIL</b>			
1	DIL	Digital interlocking: When its input is high, all other input terminals are forced to be invalid	Two-core twisted-pair cable is recommended Cross-sectional area: 0.5-2.5mm <sup>2</sup>
2	PW	Provides power supply for DIL, DI1-DI6, HDI, HDO	
3	COM	Digital input Common ground	
Jumper J10: Power selection			
		When pin 1 and pin 2 are short-circuited, i.e. the PW and internal COM are connected, DI uses the internal power ground. If the external power supply is used, the shorting cap should be removed.	
		When pin 2 and pin 3 are short-circuited, i.e. the PW and internal +24Vare connected, DI uses the internal power. If the external power supply is used, the shorting cap should be removed.	
<b>HDIO</b>			
1	+24	1. Input Type: PNP, NPN 2. Input frequency range: 0-50kHz 3. Input Voltage range: 12-30V 4. Duty cycle: 30%-70%	Two-core twisted-pair cable is recommended. Cross-sectional area: 0.5-2.5mm <sup>2</sup>
2	HDI1		
3	HDI2		
4	COM	1. Output Type: OC 2. Output frequency range: 0-50kHz	
5	HDO1	3. Max. output load: 20mA/30V	
6	HDO2	4. Duty ratio: 50%	HDI and COM, HDO and COM use twisted-pair cables.
<b>485 Communication terminal</b>			
1	485+	RS485 bus, standard 5V level Terminal resistance: 120 Ω	Two-core twisted-pair cable is recommended.
2	485-	Maximum Baud Rate: 115200	
3	PE	Maximum nodes: 32 (without relay)	Cross-sectional area: 0.5-2.5mm <sup>2</sup>
Jumper J8: Terminal resistance selection			
		When 1 and 2 are short-circuited, the terminal resistor is disconnected.	
		When 2 and 3 are short-circuited, the terminal resistor is connected.	
<b>Analog input terminal</b>			
1	-10V	Positive and negative 10V power supply Max.	
2	+10V	output current: 10mA	When two AIs are used, use two two-core shielded twisted-paircables.
3	AI1+	Current input: -20mA- 20mA, Rin: 500Ω	
4	AI1-	Voltage input: -10V-10V, Rin: 30kΩ	When reference voltage is used, use one four-core shielded twisted-pair cable for one AI.
5	AI2+	Differential input range: ±30V	
6	AI2-	Sampling interval: 0.1ms Resolution: 11 bit+signbit	
Jumper J4: Selection between AI1 voltage and current signal inputs			
		When 1 and 2 are short-circuited, AI1 current input is used.	
		When 2 and 3 are short-circuited, AI1 voltage input is used.	
Jumper J5: Selection between AI2 voltage and current signal inputs			
		When 1 and 2 are short-circuited, AI2 current input is used.	
		When 2 and 3 are short-circuited, AI2 voltage input is used.	
<b>Analog output terminal</b>			
Analog output	AO1	AO output range:0~20mA, Rload≤ 500Ω	Two-core twisted-pair cable is recommended.
	GND	0~10V, Rload≥10kΩ	Cross-sectional area: 0.5-2.5mm <sup>2</sup>
	AO2	Resolution: 11 bit+signbit	AO1 and GND, AO2 and GND use twisted-pair cables.
Jumper J6: Selection between AO1 voltage and current signal outputs			
		When 1 and 2 are short-circuited, AO1 current output is used.	
		When 2 and 3 are short-circuited, AO1 voltage output is used.	

Terminal NO.	Terminal identification	Terminal Description	Cable specifications
Jumper J7: AO2 voltage or current signal output selection			
1		Short circuit between 1 and 2, AO2 current output	
1		Short circuit between 2 and 3, AO2 voltage output	
<b>Relay 1 output terminal</b>			
1	RO1A	Output type: passive normally open and normally closed contacts	Single core wire cross-sectional area: 0.5-2.5mm <sup>2</sup>
2	RO1B	Contact parameters: 250Vac/30Vdc, 3A	
3	RO1C		
<b>Relay 2 output terminal</b>			
1	RO2A	open and normally closed contacts	Single core wire cross-sectional area: 0.5-2.5mm <sup>2</sup>
2	RO2B	Contact parameters: 250Vac/30Vdc, 3A	
3	RO2C		
<b>Relay 3 output terminal</b>			
1	RO3A	open and normally closed contacts	Single core wire cross-sectional area: 0.5-2.5mm <sup>2</sup>
2	RO3B	Contact parameters: 250Vac/30Vdc, 3A	
3	RO3C		
<b>Master-slave optical fiber</b>			
1	TX	Sending (fiber-optic communication)	Fiber optic
2	RX	Receive (fiber-optic communication)	
<b>Safety torque interrupt</b>			
1	STO1		
2	+24V	Inverter module safety torque interrupt input	Recommend using 4-core twisted pair cables
3	STO2	Factory default short circuit	cross-sectional area: 0.5-2.5mm <sup>2</sup>
4	+24V		
<b>RJ45 for panel</b>			
1	RJ45	Connect SOP-880 panel	CAT 6
<b>RJ45 for Ethernet</b>			
1	RJ45	Communicate with PC	CAT 6

## Options

Option type	Type	Category	Specification Data
Feedback interface module	EC-PG805-24-PTH	HTL encoder module	Supporting open collector, push-pull, and differential encoders, and pulse reference and frequency-divided output Supporting PT100 based temperature detection
	EC-PG805-05-PTH	TTL encoder module	Supporting differential or RS422 signal input encoders, and pulse reference and frequency-divided output Supporting PT100 based temperature detection
	EC-PG804-PTH	Resolver encoder module	Rotary transformer type encoder; 10/20KHz optional, supports KTY84 or PT100 temperature detection
Communication module	EC-TX803	Profibus-DP communication module	Profibus-DP, 9.6Kbit-12Mbit/S
	EC-TX809	Profinet IO communication module	Profinet IO, 100Mbit/S
	EC-TX809U	Multifunctional EtherNet module	Powerlink, Profinet, EtherNet/IP, Modbus TCP, EtherCAT
Fiber optic module	EC-TX821	1-channel fiber-optic module	1-channel 50M fiber-optic module
	EC-TX823	3-channel fiber-optic module	3-channel 50M fiber-optic module
I/O module	EC-IO801	I/O module	3DI+2AI+2AO+1RO
Voltage detection module	IVDM-10	AC voltage detection module	0-100VAC or 0-690VAC
	IVDM-20	DC voltage detection module	0-1000VDC

# Cabinet code description

Control cabinet (CU)   Incoming cabinet (LCM)   Active rectifier cabinet (ASU)   Inverter cabinet (INV)   Combiner cabinet (ACC)   Braking cabinet (BKC)   Basic rectifier cabinet (TSU)   Regenerative rectifier cabinet (RSU)

Name	Code	Size (W*H*D)	Description
Incoming cabinet (LCM)	LCM11	400*2140*650	800A circuit breaker cabinet
	LCM12	400*2140*650	1000A circuit breaker cabinet
	LCM13	400*2140*650	1250A circuit breaker cabinet
	LCM14	400*2140*650	1600A circuit breaker cabinet
	LCM25	600*2140*650	2000A circuit breaker cabinet
	LCM26	600*2140*650	2500A circuit breaker cabinet
	LCM27	600*2140*650	3200A circuit breaker cabinet
	LCM58	1000*2140*650	4000A circuit breaker cabinet
	LCM59	1000*2140*650	5000A circuit breaker cabinet
Control cabinet (CU)	CU1X	400*2140*650	X:Control unit quantity, no more than 3
	CU2X	600*2140*650	X:Control unit quantity, no more than 6
Basic rectifier cabinet (TSU)	TSU11	400*2140*650	Basic rectifier cabinet 1 (1*D8T)
	TSU22	600*2140*650	Basic rectifier cabinet 2 (2*D8T)
	TSU33	800*2140*650	Basic rectifier cabinet 3 (3*D8T)
Regenerative rectifier cabinet (RSU)	RSU21	600*2140*650	Regenerative rectifier cabinet 1 (A8+L)
	RSU42	850*2140*650	Regenerative rectifier cabinet 2 (2*A8+L)
Active rectifier cabinet (ASU)	ASU21	600*2140*650	Active rectifier cabinet 1 (A8+LCL)
	ASU42	850*2140*650	Active rectifier cabinet 2 (2*A8+LCL)
Inverter cabinet (INV)	INV11	400*2140*650	Inverter cabinet (A6i~A8i)
	INV22	600*2140*650	Inverter cabinet (2*A8i)
	INV33	800*2140*650	Inverter cabinet (3*A8i)
Braking cabinet (BKC)	BKC21	600*2140*650	3PH braking cabinet
Combiner cabinet	ACC20	600*2140*650	Mainly used for bus connection and motor output cable convergence

# GD880-76 basic rectifier cabinet (TSU)

$U_N=400V$  (range: 380-480V). The power ratings are valid at nominal voltage 400V (475-3616kW).

Note:

Nominal ratings:  $I_N$ , Rated output current available continuously without overloadability at 40 °C.  $I_{max}$ , Maximum output current. Available for 10 seconds at start, then as long as allowed by drive temperature.

Light overload use:  $I_{ld}$ , Continuous current allowing 110%  $I_{ld}$  for 1 minute every 5 minutes at 40 °C.

Heavy overload use:  $I_{hd}$ , Continuous current allowing 150%  $I_{hd}$  for 1 minute every 5 minutes at 40 °C.

Note:

Nominal ratings:  $I_N$  indicates the continuous operating current without overload at 40°C, while  $I_{max}$  indicates max. output current.

Light overload use:  $I_{LD}$  indicates the light overload continuous operating current. 110% \*  $I_{LD}$  is allowed for 1 minute every 5 minutes at 40°C.

Heavy overload use:  $I_{HD}$  indicates the heavy overload continuous operating current. 150% \*  $I_{HD}$  is allowed for 1 minute every 5 minutes at 40°C.

# GD880-96 active rectifier cabinet (ASU)

$U_N=400V$  (range: 380-480V). The power ratings are valid at nominal voltage 400V (151-3169kW).

GD880-46-0750-4	$R_{min}$	1.2	653	1171	465	750	1499	527	960	BKC21	2.4	1500	600*2140*650
	$R_{max}$	1.4	653	975	387	624	1249	436	800		2.0	1500	

$U_N=690V$  (range: 520-690V). The power ratings are valid at nominal voltage 690V (870-1300kW).

Drive type	Resistor values		$U_{br}$	Nominal ratings			Duty cycle use (1min/5min)			Frame size	Heat dissipation kW	Air flow $m^3/h$	Size (W*H*D)
	ohm			V	$I_{DC}$ A(DC)	$I_{rms}$ A(AC)	$P_N$ kW	$I_{DC}$ A(DC)	$I_{rms}$ A(AC)	$P_{HB}$ kW			
GD880-46-0870-6	$R_{min}$	3.0	1126	781	310	870	999	351	1100	BKC21	1.6	1500	600*2140*650
	$R_{max}$	3.6	1126	650	258	725	832	291	920		1.4	1500	
GD880-46-1300-6	$R_{min}$	2.0	1126	1171	465	1300	1499	527	1655	BKC21	2.5	1500	600*2140*650
	$R_{max}$	2.4	1126	975	387	1080	1249	436	1390		2.1	1500	

Note:

Power:  $P_N$ : Max. continuous braking power.  $P_{HB}$ : Short-time braking power that last for 1 minute within successive 5 minutes (with empty load in the other 4 minutes).

Current:  $I_{DC}$ : Total input current of the braking unit.  $I_{rms}$ : Total root mean square value of DC output phase current of the braking unit.

Resistor:  $R_{min}$ : Min. value allowed by each-phase braking resistor.  $R_{max}$ : Max. value allowed by each-phase braking resistor.

## Note:

Nominal ratings: I<sub>N</sub> indicates the continuous operating current without overload at 40°C, while I<sub>max</sub> indicates max. output current.Light overload use: I<sub>LD</sub> indicates the light overload continuous operating current. 110%\*I<sub>LD</sub> is allowed for 1 minute every 5 minutes at 40°C.Heavy overload use: I<sub>HD</sub> indicates the heavy overload continuous operating current. 150% \*I<sub>HD</sub> is allowed for 1 minute every 5 minutes at 40°C.

Note			① Single cabinet products are equipped with lifting rings as standard, while combination cabinet products are equipped with lifting lintels as standard. ② Products below 800A are equipped with isolation switches as standard, and 800A-1600A (inclusive) products are equipped with molded case circuit breaker as standard. Products above 1600A are equipped with fixed circuit breaker as standard. ③ Drawer-type circuit breakers are optional for 2000A and above products. ④ Products above 800A do not support optional AC contactors, and GD880 single-drive cabinet 16S4 and 16S5 do not support the optional configuration of AC contactors. ⑤ The single-drive cabinet 16S5 does not support optional installation of AC quick fuses. ⑥ Input reactor: only for -16 products. Standard configuration for rectifier unit using D8T frame, optional for other frames. ⑦ Output reactor: standard configuration for A8 and above frames, optional for other frames. ⑧ Top entry of cables: optional for A8 and above frames, which may involve cabinet size increase. ⑨ Top exit of cables: optional for A8 and above frames, which may involve cabinet size increase.

## Optional parts

Name	Ordering	Model	Description
PROFINET IO communication module	11023-00168	EC-TX809	PROFINET IO industrial Ethernet
PROFIBUS DP communication module	11023-00161	EC-TX803	PROFIBUS DP, 9.6k bit/s-12M bit/s
CANopen communication module	11023-00170	EC-TX805	Canopen, 20kbps-1M bps
Fiber optic module	11023-00157	EC-TX821	1-channel fiber-optic module
Fiber optic module	11023-00158	EC-TX823	3-channel fiber-optic module
HTL encoder module	11023-00155	EC-PG805-24	Supporting open collector ,push-pull and differential encoders, and pulse reference and frequency-divider output supporting PT100 based temperature detection
TTL encoder module	11023-00166	EC-PG805-05	Supporting differential encoders or RS422 signal input encoders and pulse reference and frequency-divider output supporting PT100 based temperature detection
Resolver encoder module	11023-00172	EC-PG804	Rotary transformer type encoder, 10/20K optional, supports PT100 or KTY84 temperature detection
IO module	11023-00156	EC-IO801	2 AI+2AO+3DI+1RO
DC precharge module	11029-00141	BUB600-7R5-4	Applicable to A1i-A2i
DC precharge module	11029-00142	BUB600-037-4	Applicable to A3i
DC precharge module	11029-00146	BUB600-075-4	Applicable to A4i
AC precharge component	19005-00361	BUB880-0516-4	Applicable to A7i and below
AC precharge component	11020-00220	BUB800-0900-4	Applicable to A8i
AC precharge component	11020-00222	BUB800-1770-4	Applicable to 2*A8i
AC precharge component	11020-00219	BUB800-0900-6	Applicable to A8i
AC precharge component	11020-00221	BUB800-1770-6	Applicable to 2*A8i
keyboard external lead-out kit	11091-00016	SOP-880-IP20	Keyboard external lead-out kit (IP20)
keyboard external lead-out kit	11091-00017	SOP-880-IP54	Keyboard external lead-out kit (IP54)
A6A7 magnet ring assembly	11029-00164	CF-A7	Applicable to A6i-A7i
A8 magnet ring assembly	11029-00165	CF-A8	Applicable to A8i/A8n/A8L2
A8i ramp slide plate	62001-02793	MB-A8	Applicable to A8i
A8n maintenance bracket	62001-03692	MB-A8n	Applicable to A8n
A6A7 maintenance bracket	62001-04410	MB-A7	Applicable to A6-A7
LCL Unit slide	99003-06898	MB-LCL	Applicable to LCL/L filter units
